

Marketing Release Note

Wireless Panda Keypad for LightSYS+/Air

RW432KPP802A | RW432KPP402A

November 2023

RISCO is happy to announce the release of the new Wireless Panda keypad for LightSYS+ and LightSYS Air, 868MHz and 433MHz.

The new Wireless keypad for LightSYS+ offers additional capabilities and benefits to installers that outperform the previous wireless Panda for LightSYS 2:

Key messages:

- **Flexibility** – When installed with LightSYS+ it allows a quick and easy all-wireless installation.
- **Ease of Use** – Programming functionality as a wired RISCO keypad, simulating a Bus connection.
- **Convenience** – Complete flexibility to place it where needed with no drilling and wiring.
- **Efficiency** - One wireless keypad for RISCO's wireless and hybrid systems, making the installer's maintenance and stock management more efficient.

- **Save time and money** – The keypad can be Upgraded automatically, without the hassle of on-site visits from engineers. Our remote upgrade capability ensures efficient and cost-effective processes.

Technical considerations

When installed with LightSYS+ a Wireless Video Module should be used.

Compatibility

LightSYS+ and LightSYS Air FW version 3.0.1
